

REMARKSAmendments to the Claims:

The amendments to the claims have been made to amend any multiple dependent claims to depend from only one claim and to clarify the language of the claims in conformity with US practice.

Claim 1 has furthermore been amended to include features of original claim 2. Claims 1 to 16 thus correspond to the claims on which the International Preliminary Examination Report was based.

New claims 19 and 20 have been added to more clearly define the invention as understood by the Applicant. In particular, claim 19 corresponds to the features of original claim 1 combined with the features of claim 5. Claim 20 further includes the feature of claim 12 that the vertical guidance element is at least one vertically arranged coil spring and the guidance pin is positioned inside the coil spring.

It is believed that no further subject matter has been added by these amendments.
